

combining items, the added item adds detail to the first item to make the combination obvious. Here the Zalm '456 reference is designed for interlaced displays therefore the technology would have to be changed, not simply augmented to be a working combination using the technology of Guralnick's '052 reference.

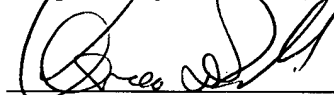

Additionally the Applicants⁴ believe that Guralnick's "052 reference standing alone would not qualify as 35 USC 102 reference since the Applicants' claimed invention is not identical to that of Guralnick's "052 reference.

Therefore, for the reasons cited above, the Applicants respectfully traverse the Examiner's rejections of claims 1-21.

The Applicants⁴ will be in the near future filing a Change of Power of Attorney from the firm of Fish and Neave to the undersigned and others. If a timely discussion is needed, please contact the undersigned.

The applicants respectfully request reconsideration of the application and an early allowance.

Respectfully submitted,

Gerow D. Brill
